Description of the software

KEY5 is the new (2006) multimedia Chinese authoring, teaching and learning system for the **PC operating platforms Windows 95/98/Me/NT/2000/XP**. It includes Text To Speech, 250,000-word Chinese/English dictionary, Timed Reading Module, Annotation feature etc.

MacKEY is the equivalent of **KEY** for the **Mac OS X** operating platforms.

KEYTIP is the multimedia "talking" Chinese/English online dictionary that works independently from **KEY**, e.g., in your browser while viewing a Chinese website: pointing at the Chinese words reads them aloud in standard Mandarin and displays their English meaning, their Traditional / Simplified forms and other information in a small pop-up window.

Using the combination of KEY & KEYTIP (**KEYTIP** presently only available for PC-Windows) the learner automatically includes the Chinese web, thus spanning the entire scope of computerized Chinese writing, reading, listening and learning.
